EXPLANATORY NOTES ON STATISTICAL DIVISIONS, ETC.

1. *Statistical Divisions*

As from 1961-62 Statistical Divisions of Tasmania have been determined on a new basis. The principle of Statistical Divisions composed of groups of complete local Government Areas has been adopted as compared with the former arragement under which various local Government Areas bordering Hobart and Launceston were split into two parts for the purpose of including the suburban portion in Hobart and Suburbs or Launceston and Suburbs Statistical Division and the remaining portion in the adjoining Statistical Divisions.

The following table compares the titles and composition of the former and current Statistical Divisions—

Former Statistical Divisions		Current Statistical Divisions	
Title	Composition (Local Government Areas)	Title	Composition (Local Government Areas)
Hobart and Suburbs (*a*)	Hobart and Glenorchy and *suburban portions* of Clarence and Kingborough	South Central	Hobart and Glenorchy
Launceston and Suburbs	Launceston and *suburban portions* of Beaconsfield, St. Leonards, Lilydale and Westbury	North Central	Launceston
North Western	King Island, Circular Head, Wynyard, Burnie, Penguin, Ulverstone, Devonport, Kentish, Deloraine, Latrobe	North Western	No change
North Eastern	Beaconsfield and Lilydale (*country portions*), George Town, Scottsdale Ringarooma, Portland, Flinders, Fingal	North Eastern	*Whole* of Beaconsfield and Lilydale plus remaining Local Government Areas in former statistical division
North Midland	St. Leonards and Westbury (*country portions*), Longford and Evandale	North Midland	*Whole* of St. Leonards and Westbury plus Longford and Evandale
Midland	Campbell Town, Ross, Oatlands, Bothwell and Hamilton	Midland	No change
South Eastern	Clarence (*country portion*), Green Ponds, Brighton, Richmond, Sorell, Spring Bay, Glamorgan	South Eastern	*Whole* of Clarence plus remaining Local Government Areas in former statistical division
Southern	Kingborough (*country portion*), Tasman, Bruny, Port Cygnet, New Norfolk, Huon, and Esperance	Southern	*Whole* of Kingborough plus remaining Local Government Areas in former statistical division
Western	Gormanston, Queenstown, Strahan, Zeehan and Waratah	Western	No change

(*a*) Also referred to as "Metropolitan"

It is intended as far as practicable to publish demographic statistics on the current Statistical Division basis. This has been done in tables on pages 7, 23 and 50 in this bulletin. However, as almost all other statistical division tables contain comparative data for earlier years for which details on the new basis are not available, it has been necessary to continue, for a time, presentation in such tables on the old Statistical Division basis.

As an indication of the effect of this changed basis of Statistical Divisions, details of the estimated population at 30th June, 1964 for the affected Local Government Areas are shown in the following table—

Estimated Population at 30th June, 1964—Persons

Local Government Area	Suburban (*a*)	Country	Total
Clarence	25,323	2,777	28,100
Kingborough	5,935	4,585	10,520
Beaconsfield	3,361	5,715	9,076
Lilydale	5,225	2,395	7,620
St. Leonards	11,792	826	12,618
Westbury	872	3,941	4,813

(*a*) The population in this column which formerly formed part of "Hobart and Suburbs" or "Launceston and Suburbs" is now allocated to the Statistical Division in which the Local Government Area is situated.

2. *Hobart and Suburbs and Launceston and Suburbs*

It will be observed that the "Hobart and Suburbs" and "Launceston and Suburbs" groupings no longer form an integral part of the statistical division arrangement. However, because of the importance of demographic analyses according to these groupings, it is intended where appropriate to continue to publish statistics for "Hobart and Suburbs" and "Launceston and Suburbs" either as an addendum to Statistical Division tables or separately in suitable form. To assist in interpretation of statistics under these headings, the following details of the components of Hobart Suburbs and Launceston Suburbs are listed.

Suburban Portions of Hobart and Launceston

Local Government Area	Suburban Portion of Local Government Area
Hobart Suburbs	
Glenorchy	Whole of Local Government Area
Clarence	Bellerive, Geilston Bay, Howrah, Lindisfarne, Risdon Vale and Warrane
Kingborough	Blackman's Bay, Kingston, Kingston Beach and Taroona
Launceston Suburbs	
Beaconsfield	Cormiston, Marawaylee, Riverside and Trevallyn
Lilydale	Mayfield, Newnham, Rocherlea and Vermont
St. Leonards	Elphin, Franklin Village, Norwood, Punchbowl, Ravenswood, St. Leonards, Waverley and Youngtown
Westbury	Prospect and Prospect Vale

3. *Allocation of Vital Events to Usual Place of Residence*

In this bulletin all vital events except marriages are allocated to the place of usual residence. Marriages are allocated to the place in which the marriage was celebrated.

1. POPULATION

NOTE:—Population estimates for periods subsequent to the Census of 30th June, 1961, represent the population ascertained at the census plus natural increase and recorded net migration since that date. As complete records of interstate migration are not available the estimated population since 30th June, 1961, is approximate and is subject to revision when the actual population is ascertained at the next census.

POPULATION AND DWELLINGS IN LOCALITIES—TASMANIA

CENSUS 30TH JUNE, 1961

NOTE.—In the rural areas clearly defined boundaries of towns and other localities are not often available, and the figures shown below have been derived from Census schedules relating to the dwellings which were stated to be within the generally accepted limits of the town or district specified. Wherever the requisite information was available from Census Collectors or from Census maps, details of towns were compiled separately, but in the absence of information necessary to separate the town from the surrounding district, the whole area has been regarded as one locality, which may therefore cover a very wide area, especially in the less densely settled areas of the State. Dwellings located beyond the limits of a town for which details were separately recorded, and which were in an area which had no other recognised name, were recorded as "near" the appropriate town.

DEATHS FROM MALIGNANT NEOPLASMS (ALL FORMS), COMPARED WITH DEATHS FROM ALL CAUSES

NOTE.—Owing to changes in classification and in the methods of determining a single cause of death in cases where multiple causes are shown on the death certificate, the figures in the following table are not strictly comparable throughout the whole period. However, the figures from 1950 onwards are on a comparable basis.

SCOPE AND DEFINITIONS

Scope: The statistics included in this volume relate to goods imported and exported by sea and air as part of Tasmania's trade with other Australian States and oversea countries.

Source of Data: Statistics of oversea trade are based on documents required by the Department of Customs and Excise under the Customs Act. Statistics of interstate trade by sea are compiled from trade warrants required under the authority of the Marine Act 1921. Statistics of interstate trade by air are compiled from returns furnished direct to the Tasmanian Office of the Commonwealth Bureau of Census and Statistics by all those who use this medium for the transportation of goods.

Country of Origin and Destination: The countries shown are those from and to which *direct* shipments are made. Goods shown as imported from the other Australian States include those goods imported from oversea and transhipped to Tasmania; and similarly exports to other Australian States include goods exported for transhipment oversea.

Values: All values in this bulletin are expressed in terms of £ Australian. Basis of value for oversea imports is "transaction value, actual (f.o.b.)" or "domestic value (f.o.b.)" if higher. Oversea exports are valued at the Australian f.o.b. port of shipment equivalent of—(i) for goods sold before export, the price at which the goods were sold, or (ii) for goods shipped on consignment, the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were despatched. Interstate imports and exports are valued f.o.b. at port of shipment.

Quantities: Where quantities are shown, they are expressed, as far as possible, in terms of normal trade units. Quantities are not quoted in respect of those commodities for which there is no appropriate unit of quantity, e.g., Clothing, Fancy Goods, &c.

Tourist, &c. Motor Vehicles: Import and export details of motor cars and commercial vehicles include tourist, &c. vehicles entering and leaving the State. The inauguration of the vehicular ferry service by the "Princess of Tasmania" in October, 1959 resulted in a sharp increase in the transport of the latter type of vehicles. In 1963–64 approximately £8,500,000 of both import and export values derives from the movement of tourist vehicles.

Outside Packages: The value of containers, crates, &c., in which goods are ordinarily imported from oversea is omitted from all import tables. In 1963–64 these outside packages were valued at £240,662. For oversea exports, however, the value recorded for each item includes the value of the outside package.

General: For some individual articles of interstate imports, the quantities and values set opposite them are not complete, because the absence of itemised details necessitates their inclusion under general headings, e.g., some tea, coffee and other packaged goods would be included under "Groceries (Unspecified)"; similarly individual items of apparel and attire would be included under "Drapery (Unspecified)".

Classification of Imports and Exports: The tables of imports and exports in this Bulletin have been compiled according to a statistical classification divided into 21 classes, which came into operation on 1st July, 1945.

Tasmanian Ports: The names of ports in subsequent tables refer to the towns in which the controlling marine boards are located. Thus "Hobart" includes Port Huon; "Launceston" includes Bell Bay, &c. On 1st January, 1963 the port of Ulverstone came under the control of the Marine Board of Devonport, and from that date interstate trade through Ulverstone has been included under "Devonport".

(*a*) The figures given for each port do *not* take into account coastal movement of shipping. Ships are recorded as arrivals at the *first* Tasmanian port of call only, and as departures only at the *last* port of call in Tasmania. A vessel coming direct to Stanley from Melbourne, calling at Burnie, Ulverstone, Devonport and Launceston and leaving the latter port for Sydney, would be recorded only as an arrival at Stanley and a departure from Launceston. For total shipping (including coastwise) at each port, see page 36.
(*b*) Includes shipping through the port of Ulverstone; see note on page 3.

CARGO DISCHARGED AND SHIPPED

NOTE.—Cargo is recorded either in units of weight ("ton weight") or in units of volume ("ton measurement" equal to 40 cu. ft.). As totals derived from conversion to a common weight, or alternatively, to a common volume, would not be accurate, entries in each of the two units are recorded and published separately.

RURAL INDUSTRY STATISTICS

(I) SOURCES OF INFORMATION

The statistics are, in the main, compiled from census returns (see Appendix "A") of agricultural, pastoral and dairying production collected from some 11,000 rural holdings in Tasmania at 31st March each year. In conjunction with the general census, supplementary collections from farms are conducted where the harvesting of certain crops has not been completed by 31st March (e.g. apples, potatoes).

Additional information is also obtained from a number of entirely separate collections covering such data as slaughterings, meat production and dairy production and from various outside authorities.

(II) PERIOD COVERED

Data relating to area sown, production, yield per acre and number of holdings growing crops are, in general, for the season ended 31st March. In cases where harvesting has not been completed by 31st March (e.g. potatoes) total production is nevertheless included.

Livestock numbers are reported as at 31st March but production of livestock products have, in general, been shown for the twelve months ended 30th June.

A seasonal calendar showing approximate dates of planting and harvesting, shearing, lambing and slaughtering for export appears on page fifty-three of this Bulletin.

Farm machinery on rural holdings is reported as at 31st March.

(III) DEFINITIONS AND EXPLANATORY NOTES

RURAL HOLDINGS—A "rural holding" is defined for the purpose of these statistics as a piece of land of one acre or more in extent, used for the production of agricultural products or for the raising of livestock and the production of livestock products. In cases where land owners or occupiers possess or work more than one holding, separate returns are required for each except where the holdings are in close proximity and are worked as one, in which case one return only is submitted covering the two or more holdings concerned.

AREA OF CROPS—Total area of land sown or planted to crops is shown irrespective of whether the whole area was subsequently harvested or whether a portion or the whole of the crop failed and was not harvested.

Where two successive crops are grown on the same land during the one season, the land is included twice in area of crops. Where two crops are grown together, however, the area is counted once only and is divided between the different crops according to the proportion of each crop grown. No data on the area planted to individual varieties of orchard fruits are collected but estimates are included in this Bulletin based on the reported total acreage and number of trees of each variety planted.

YIELD PER ACRE—Statistics published in this Bulletin relate to yield per acre sown or planted. Data as to acreages of crops harvested are not collected and consequently particulars of yield per acre harvested are not available. In the case of fruit and hops the yields shown are per acre of bearing crops.

PERSONS WORKING ON HOLDINGS—Details are collected on the general farm census of persons working on rural holdings at 31st March. Persons working permanently full-time include all other than casual or seasonal workers and females engaged principally in domestic duties, children attending schools and other persons working only part-time. Casual or seasonal workers including contractors for shearing, fencing, &c. are shown as temporary employees.

Attention is drawn to the difficulty encountered in obtaining data on persons employed on a comparable basis from year to year. The difficulty applies mainly to females and arises because of the tendency of many farmers to include part-time family helpers as full-time workers in their returns.

CLASSIFICATION OF GREASY WOOL ACCORDING TO QUALITY—Statistics of greasy wool sold at auction according to the predominant quality of the wool are compiled by the Wool Statistical Service. The quality of the wool (expressed as 64's, 60's, 58's, &c.) is a measure of the fineness and texture of wool for spinning purposes. Broadly, it means the maximum number of hanks (lengths of yarn each of 560 yards) which can be spun from 1 lb. of combed wool. For instance, wool of 64's quality is of a fineness and texture which will produce 64 hanks from 1 lb. of tops (combed wool) of that particular wool.

LIVESTOCK SLAUGHTERED AND MEAT PRODUCTION—Monthly returns are collected from principal slaughterers (abattoirs, meat works and bacon factories) and these, together with annual returns for all other slaughterers (the general census return from farms and a special return from other small slaughterers), provide the necessary data for compiling both monthly and annual estimates of all livestock slaughtered and meat production.

Livestock shown as slaughtered for human consumption exclude those slaughtered for human consumption and subsequently condemned.

Statistics of meat production are recorded in terms of carcass (bone-in) weight. Edible offal other than kidneys and pigs' tongues are excluded.

DAIRY PRODUCTION—Total whole milk production has been estimated by the conversion of butter, cheese and cream production (both factory and farm) to milk equivalents together with estimates of fluid milk consumption which have been based on data supplied by the Milk Board.

Milk production per dairy cow has been based on the number of dairy cows which were in milk during any part of the year (the mean of the numbers of dairy cows, dry and in milk at 31st March of the current year and at 31st March of the previous year has been taken for this purpose). It is lower than for cows kept entirely for milking purposes or for cows yielding during the greater part of the year.

WEIGHTS AND MEASURES—Cereals, orchard fruits and certain other products are generally recorded in bushels. Whilst the weight of a bushel varies according to the nature of the product it is also subject to considerable variation for the individual products on account of such things as variety and method of packing. However, average bushel equivalent weights, as set out below may be used for the conversion of each of these products to pounds weight avoirdupois.

NON-RURAL INDUSTRIES

MINING STATISTICS

(i) DEFINITION

For statistical purposes, the mining and quarrying industry is defined as including all mining and quarrying, and the recovering of minerals from ore dumps, tailings, &c.; ore dressing and elementary smelting of metallic minerals (e.g. in the case of gold) when carried out at or near the mine are included. However, establishments primarily engaged in smelting and/or refining (including the smelting and refining sections of Mt. Lyell), are omitted and are classified to the manufacturing industry (Part V (ii), Secondary Industries).

This definition differs from that of the State Mines Department which includes in its statistics the smelting and refining operations carried out at Mt. Lyell, and, in respect of minerals originating in Tasmania, at Risdon. For Mt. Lyell, only those operations up to the point of production of copper concentrate are included in the Bureau's mining statistics, while smelting and refining are included in factory statistics. Refining operations carried out at Risdon are also included in factory statistics.

Also included in the mining and quarrying industry are quarries operated by brickworks, cement works, &c., and those winning direct construction materials such as sand, gravel, building stone, and broken and crushed stone for roadmaking, &c.

(ii) SOURCES OF INFORMATION

(*a*) Employment, Production Costs, Values of Output and Production, &c.—

An annual census of mines and quarries is conducted by the Bureau and details are collected for calendar years. In the main table covering employment, materials used, salaries and wages &c., details are shown firstly for those mines and quarries employing four or more persons, to achieve uniformity with other Australian States, and secondly for all mines and quarries. Details relating to those tin mines with production valued at less than £500 are included only in value of Output and Value of Production items.

(*b*) Quantities Produced, Assayed Contents, &c.—

Statistics relating to quantities of minerals produced are, in the main, obtained from the State Mines Department and are supplemented, where necessary, with data obtained from the annual census of mines and quarries and from the Commonwealth Bureau of Mineral Resources.

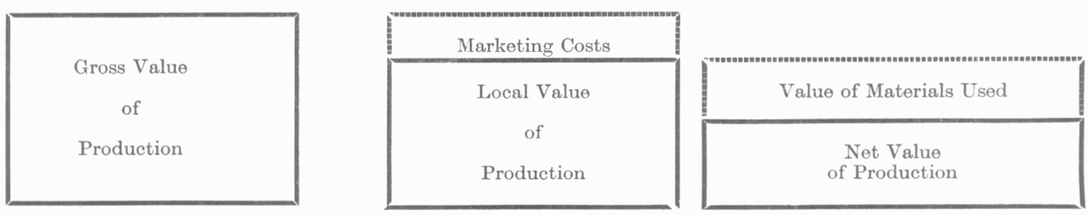
VALUE OF PRODUCTION

(i) SOURCES OF INFORMATION

The data used are those concerning quantity of primary production (see page 3) together with information collected from various sources on prices realised in the principal markets for different products, the costs of marketing these products and the costs of certain materials used in their production.

Price and cost data are obtained from statutory authorities (e.g. Dairy Produce Equalisation Committee), market reports, special returns collected from wholesalers, brokers, auctioneers, &c., annual factory returns (showing cost of raw material delivered to factory) and from oversea trade statistics.

(ii) DEFINITIONS AND EXPLANATORY NOTES



Gross Value of Production—This is the value placed on recorded production at the wholesale prices realised in the principal markets. (In cases where primary products are consumed locally, or where they become raw material for a secondary industry, these points are presumed to be the principal markets.)

Marketing Costs—These include freight, cost of containers, commission and other charges incurred in marketing.

Local Value of Production—(i.e. gross production valued at place of production). This is gross value of production *less* marketing costs.

Value of Materials Used—These include power, power kerosene, petrol and other oils (as from 1958–59), seed used, fodder consumed by farm stock, fertilizers, dips and sprays and other selected costs of a similar nature.

Net Value of Production—This is local value of production *less* value of materials used in process of production. The net value of production exceeds the net return to producers since no deductions are made for depreciation, maintenance, interest on borrowed money, wages and a number of other production costs.

Unit Values—These have been calculated for principal rural products by dividing the total quantity produced into the total gross value of production for each product. They therefore represent weighted average "prices" in all markets (including the farm itself where quantities are retained for farm use) for the product.

Government Subsidies and Bounties—Subsidies and bounties paid by the State and Commonwealth Governments to primary industries, are in general, included in value of production.

Comparing or Combining Industries—Both gross and local values of primary production involve some duplication because they include the values of certain products as the final output of one primary industry and again as the raw material of another (e.g. hay from *agriculture* consumed by livestock under *pastoral* and *dairying*). Similarly, many materials consumed by primary industries are the products of secondary industries (e.g. fertilizers).

In calculating the Net Value of Production, the values of both primary and secondary products consumed by primary industries have been deducted and this process automatically eliminates duplication. It follows, therefore, that Net Value of Production should be used when comparing or combining values for individual primary industries and when comparing or combining values for primary and secondary industries.

(*a*) Includes orchards and small fruits but excludes areas of clover and grasses *cut* for hay, seed, silage or green fodder.
(*b*) Excludes short or summer fallow.
(*c*) Includes areas cut for hay, seed, silage or green fodder, which are classified as "crops" in tables on other pages. Total area classified in this way is 147,375 acres.
(*d*) Area of holdings exceeds area of Local Government Area; where a rural holding extends across a Local Government Area boundary the location of the homestead determines the Local Government Area to which the whole holding is allocated.

SUMMARY OF LIVESTOCK

Cattle

Note on Collection of Cattle Statistics—Following an investigation into the adequacy of the wording and layout of the cattle section of the statistical form used for the 1962–63 census and preceding censuses of rural holdings, certain changes were made to the forms used for the census conducted at 31st March 1964.

Prior to 1964 farmers were asked to classify their herds either as "beef" cattle or "dairy" cattle. These two terms tended to confuse breed and purpose, and in those instances where vealer production was carried on in association with dairying, farmers were in doubt as to how to classify part or all of their herds.

On 31st March, 1964 farmers were asked to classify their cattle according to the two main purposes for which kept viz. (i) milk production and (ii) meat production, irrespective of breed and to report separately the number of cows and heifers kept for their own domestic milk supply. Consequently detailed statistics of cattle for 1964 are not comparable with those for earlier years. However, four broad groupings of cattle are generally comparable with earlier years and particulars are shown in the last table on this page.

For comparative purposes the full description of cattle as listed on farmers' census schedules for both 1963 and 1964 is shown below. The total number of each type of cattle in Tasmania at the 1963 and 1964 Census dates is also shown.

(a) Average annual yields are based on the estimated number of dairy cows which were in milk at any part of the year. (The mean of the number of dairy cows at 31st March of the current year and at 31st March of the previous year are taken for this purpose.) Averages are therefore, lower than for cows which were yielding during the greater part of the year. The figures given should be treated as an index rather than an actual average quantity of milk produced per dairy cow.
(b) "House" cows excluded as from 1963-64.
(c) As a result of revised classifications of cattle adopted from 1963-64, the average annual yield per cow is not strictly comparable with the calculations made for previous years. See page 26.

DEFINITIONS AND EXPLANATORY NOTES

PRIMARY INDUSTRIES—The following are definitions of the terms used—

GROSS VALUE OF PRODUCTION—This is the value placed on recorded production at the wholesale price realised in the principal market. (In cases where primary products are consumed locally, or where they become raw material for a secondary industry, these points are presumed to be the principal markets.)

MARKETING COSTS—These include freight, cost of containers, commission and other charges incurred in marketing.

LOCAL VALUE OF PRODUCTION—(i.e. gross production valued at place of production)—This is ascertained by deducting Marketing Costs from Gross Value of Production.

VALUE OF MATERIALS USED IN PROCESS OF PRODUCTION—These include power, power kerosene, petrol and other oils, seed used, fodder consumed by farm stock, fertilizers, dips and sprays, and other selected costs of a similar nature. No allowance for power, power kerosene, petrol and other oils has been made for the years 1942–43 to 1957–58.

NET VALUE OF PRODUCTION—This is ascertained by deducting the Value of Materials Used in Process of Production from the Local Value of Production. No deductions have been made for depreciation or certain maintenance charges as particulars are not available.

GOVERNMENT SUBSIDIES AND BOUNTIES—Subsidies and bounties paid by the State and Commonwealth Governments to primary industries are, in general, included in value of production.

Gross and Local Values of primary production involve some duplication as they include the products of certain primary industries which are consumed as raw materials by other industries in the group (i.e. hay consumed by livestock). Furthermore, many of the materials consumed by primary industries are the products of secondary industry. However, duplication has been eliminated in calculating the Net Value of primary production by deducting the value of both primary and secondary products consumed by primary industries. Therefore, Net Value of primary production should be used when comparing or combining values for primary industries with those for secondary industries.

(e) Gross values *excluding* Quarrying prior to 1952–53.

AVERAGE UNIT GROSS VALUE OF CROPS—TASMANIA

NOTE—*Unit Values* have been calculated for principal agricultural products by dividing the total quantity produced into the total gross value of production for each product. They therefore represent weighted average "prices" in all markets (including the farm itself where quantities are retained for farm use) for the product.

SPECIAL INSTRUCTION ON CROPS

Season. Generally, all crops grown in the year from 1st April to 31st March are to be included but some crops at 31st March will be practically matured but not yet harvested; in the case of such crops, please estimate probable yield and include it in the total. (Special collections will be made later in the case of orchard fruit and potato yields.)

Total Production. Should include all crops whether sold directly, delivered to marketing boards, retained for seed, consumed or stored on the holding or disposed of by gift, barter or delivery to the holder of a lien over the crop.

Crops for Grain or Hay. A crop harvested for grain or hay should *not* be entered again as a green fodder crop.

Failure of Crop. (1) If the failure is total, show area sown and write "F" in lieu of production figure; if failure is partial, show actual production figure. If a crop originally intended for grain was subsequently fed off entirely, still show the area under grain and not under green fodder.

(2) Crops ploughed in or dug in because they could not be marketed should be included as failures. However, green crops grown for ploughing in as green manure should be included under "All Other Crops," showing area only.

Double Cropping. (1) If two crops are grown on the same area at different times during the year, such area must be included twice in the area sown column.

(2) If two crops are grown together at the same time on the same area, then the area should be counted once only and apportioned between the two crops according to their relative importance.

(3) In the case of crops like lucerne which may be cut more than once, include the area once only but add all mowings to get the production figure.

LIVESTOCK

Please record all livestock belonging to the holding on 31st March, including those owned by you, share-farmers or members of the family, as well as those on agistment elsewhere.

METEOROLOGY

(Source: Bureau of Meteorology, Divisional Office, Hobart, from which further detailed information may be obtained on application.)

SUMMARY OF METEOROLOGICAL CONDITIONS, 1964

The strong winds and dry conditions prevalent at the end of 1963 continued into January, 1964, influencing particularly the Eastern half of the State. As a result, pastures, crops and livestock were in relatively poor condition with water storages at a low level. Mean temperatures during the first three months of the year were abnormally low and ranged from three to five degrees below in all areas of the State. The West Coast experienced the coldest January on record with mean temperatures reaching nearly five degrees below normal in some areas. This trend continued during February when Zeehan recorded its lowest mean maximum temperature for the month on record.

Heavy widespread rainfalls in February benefited the State generally and pastures and crops responded in showing a general improvement. New record high rainfalls for that month were established in most areas of the East, South-East, Midlands and parts of the inland North. The heaviest fall of 1,305 points was recorded at Eaglehawk Neck where the previous highest February reading had been 474 points.

These heavy rainfalls proved to be the forerunner of soaking rains which were a feature of the Autumn, Winter and early Spring months.

Temperatures returned to near normal in mid-Autumn and these conditions prevailed until the below normal trend was re-established in November.

Rainfall was generally below normal over the State during late spring. However, towards the close of the year the above normal rainfall trend was continued in all districts except the North and Derwent Valley. December proved to be one of the coldest and windiest on record. On 12th December, Hobart recorded its coldest December day on record when the temperature did not rise above 50 degrees. On 3rd December, a wind gust of 76 m.p.h. also set a new record for the month.

Over the year the only areas to record less than normal rainfalls were in the Upper Derwent Valley region, a section of the East Coast between St. Helens and Swansea and a small area around Goulds Country in the North-East. All other areas received above normal rainfalls with the heaviest concentrations again experienced in the North-Western and Western Highlands, where totals ranged from 90 inches to a State maximum of 158 inches at Lake Margaret.

1. MANUFACTURING STATISTICS

(i) SCOPE OF THE STATISTICS

Scope.—The statistics are compiled annually and show—

Number and size of factories: Number of persons employed, in various categories: Salaries and Wages paid Book value of land, buildings, plant and machinery (not capital invested): Value of materials, containers, repairs and replacements, power, fuel and light (including water and lubricating oil) used in factories: Value of output: Value of production: Quantities and values of fuel used: Quantities and values of principal materials used and articles produced: Value of additions and replacements to, and depreciation allowed on, land and buildings, and plant and machinery: Rated horse-power of engines ordinarily in use and those in reserve or idle.

The returns from which these statistics are compiled are obtained from manufacturers; they are not intended to show a complete record of the income or expenditure of factories nor to show the profits or losses of factories collectively or individually. A specimen copy of the factory census form and instructions are included on pages 49 to 51.

Definition of "Factory".—For the purposes of the accompanying statistics a "factory" is defined as an establishment in which four or more persons are employed or where power (other than manual) is used in any manufacturing process. *It should be noted that details relating to small establishments not classified for statistical purposes as factories are not included in the figures shown herein.*

(ii) PERIOD COVERED

The period covered by the statistics in this Bulletin, is, in the main, the twelve months ended 30th June. In cases where some other accounting period is used it is permissible to complete the census schedule for that accounting period. These cases, however, are comparatively few and their inclusion in no way impairs the comparability of the statistics in the year under review or from year to year.

(iii) DEFINITIONS OF TERMS USED

Average Number of Persons Employed.—All persons employed in the *manufacturing* activities of a factory are counted as factory employees. The figures relating to employment, therefore, *exclude* all those engaged in selling and distribution, such as salesmen, travellers, collectors, carters engaged solely on outward delivery of manufactured goods, and retailing storemen. The figures, however, do include proprietors who work in their own businesses, as well as "out-workers".

The average number of persons employed is quoted on two different bases: the average *during the period of operation* and the average *over the whole year*. Of these, the former is simply the aggregate of the average number of persons employed in each factory during its period of operation (whether the whole or only part of the year). This average is used only in respect of details relating to classification according to number of persons employed. The latter, which is used in all other instances, is calculated by reducing the average number working in the factories (irrespective of period of operation) to the equivalent number working for a full year.

Working Proprietors are included in all employment figures other than those relating to monthly employment and age dissections, but salaries and wages paid in all cases exclude drawings by working proprietors.

Value of Output.—The value of factory output is the value of the goods manufactured or their value after passing through the particular process of manufacture and includes the amount received for repair work, work done on commission and receipts for other factory work. The basis of valuation of the output is the selling value of the goods at the factory, exclusive of all delivery costs and charges and excise duties, but inclusive of bounty and subsidy payments to the manufacturer of the finished article.

Value of Production.—The value of production is the value added to raw materials by the process of manufacture. It is calculated by deducting from the value of factory output the value (at the factory) of the materials used, containers and packing, power, fuel and light used, tools replaced, and materials used in repairs to plant (but not depreciation charges).

In the process of manufacture, many goods are treated in several industries, the output of one becoming the raw materials of another, so that such commodities are counted more than once in the aggregate value of output and of raw materials. Examples are flour passing from the mills to bakeries, metals from the smelters which become raw materials in establishments concerned in the production of metal goods, and timber from the sawmills used in furniture factories and in joinery. On the other hand, the aggregate value of production is assessed without duplication, the value added by each industry being taken into account once only. For this reason the value of production, and not the value of the output, is used as a measure of activity in the manufactuing industries as a whole, or for comparisons between industries.

There are many miscellaneous expenses, such as maintenance of buildings, &c., depreciation, worker's compensation insurance, other insurances, pay-roll tax, income tax, advertising, interest on borrowed money, bad debts and many other sundry charges, which are not taken into account. Consequently it must not be inferred that when wages and salaries are deducted from value of production, the whole of the surplus is available for interest and profits.

Rated Horse-power of Engines Used.—Statistics of power used in factories other than Central Electric Stations relate to the "rated horse-power" of engines ordinarily in use and of engines in reserve or idle, omitting obsolete engines. In the case of Central Electric Stations, the figures refer to the "rated capacity" of engines and generators installed.

(iv) CLASSIFICATION OF FACTORIES

On pages 4 & 5 is the complete factory classification list which, apart from very minor amendments, has been used uniformly in all States since 1945/46. In the statistical tables on subsequent pages, where the titles of any sub-classes are not shown indicates that there are no factories in these sub-classes in Tasmania. Also to conserve space, abbreviated titles have been used for some sub-classes.

Statistics for some sub-classes are not available for separate publication because of the limited number of factories in the sub-class; however, statistics for these sub-classes are included in the appropriate class totals.

FACTORY CLASSIFICATION—COMPLETE LIST OF CLASSES AND SUB-CLASSES

Class I—*Treatment of Non-Metalliferous Mine and Quarry Products*

1. Coke Works
2. Briquetting and Pulverised Coal
3. Carbide
4. Lime, Plaster, of Paris Asphalt
5. Fibrous Plaster and Products
6. Marble, Slate, &c.
7. Cement, Portland
8. Asbestos Cement Sheets and Mouldings
9. Other Cement Goods
10. Other

Class II—*Bricks, Pottery, Glass, &c.*

1. Bricks and Tiles
2. Earthenware, China, Porcelain, Terra Cotta
3. Glass (other than bottles)
4. Glass Bottles
5. Other

Class III—*Chemicals, Dyes, Explosives, Paints, Oils, Grease*

1. Industrial and Heavy Chemicals and Acids
2. Pharmaceutical and Toilet Preparations
3. Explosives (including Fireworks)
4. Whitelead, Paints, Varnishes
5. Oils, Vegetables
6. Oils, Mineral
7. Oils Animal
8. Boiling Down, Tallow Refining
9. Soap and Candles
10. Chemical Fertilizers
11. Inks, Polishes, &c.
12. Matches
13. Other

Class IV—*Industrial Metals, Machines, Conveyances*

1. Smelting, Converting, Refining, Rolling of Iron and Steel
2. Foundries (Ferrous)
3. Plant, Equipment and Machinery, including Machine Tools
4. Other Engineering
5. Extracting and Refining of other Metals; Alloys
6. Electrical Machinery, Cables and Apparatus

Construction and Repair of Vehicles—
Tramcars and Railway Rolling Stock—

7. Government and Municipal
8. Other

Motor Vehicles—

9. Construction and Assembly
10. Repairs
11. Motor Bodies
12. Horse Drawn Vehicles
13. Motor Accessories
14. Aircraft
15. Cycles, Foot and Hand Driven, and Accessories
16. Other

Ship and Boat Building and Repairing, Marine Engineering—

17. Government
18. Other
19. Cutlery and Small Hand Tools
20. Agricultural Machines and Implements

Non-Ferrous Metals—

21. Rolling and Extrusion
22. Founding, Casting, &c.
24. Sheet Metal Working, Pressing and Stamping
25. Pipes, Tubes and Fittings—Ferrous
26. Wire and Wire Working (including Nails)

Class IV—*Industrial Metals, Machines, Conveyances (continued)*

27. Stoves, Ovens and Ranges
28. Gas Fitting and Meters
29. Lead Mills
30. Sewing Machines
31. Arms, Ammunition (excluding Explosives)
32. Wireless and Amplifying Apparatus
33. Other Metal Works

Class V—*Precious Metals, Jewellery, Plate*

1. Jewellery
2. Watches and Clocks (including Repairs)
3. Electroplating (Gold, Silver, Chromium, &c.)

Class VI—*Textiles and Textile Goods (not Dressed)*

1. Cotton Ginning
2. Cotton Spinning and Weaving
3. Wool: Carding, Spinning, Weaving
4. Hosiery and Other Knitted Goods
5. Silk Natural,
6. Rayon, Nylon and Other Synthetic Fibres
7. Flax Mills
8. Rope and Cordage
9. Canvas Goods, Tents, Tarpaulins, &c.
10. Bags and Sacks
11. Textile Dyeing, Printing and Finishing
12. Other

Class VII—*Skins and Leather (not Clothing or Footwear)*

Furs, Skins, Leather—

1. Furriers and Fur Dressing
2. Woolscouring and Fellmongery
3. Tanning, Currying and Leather Dressing

Saddlery, Harness, Bags, Trunks and Other Goods of Leather and Leather Substitutes (not Clothing or footwear)—

4. Saddlery, Harness and Whips
5. Machine Belting (Leather or Other)
6. Bags, Trunks and Other Goods of Leather, and Leather Substitutes

Class VIII—*Clothing (except Knitted)*

1. Tailoring and Ready-made Clothing
2. Waterproof and Oilskin Clothing
3. Dressmaking, Hemstitching
4. Millinery
5. Shirts, Collars, Under clothing
6. Foundation Garments
7. Handkerchiefs, Ties, Scarves
8. Hats and Caps
9. Gloves
10. Boots and Shoes (not Rubber)
11. Boot and Shoe Repairing
12. Boot and Shoe Accessories
13. Umbrellas and Walking Sticks
14. Dyeworks and Cleaning (including renovating and Repairing)
15. Other

Class IX—*Food, Drink and Tobacco*

1. Flour Milling
2. Cereal Foods and Starch
3. Animal and Bird Foods
4. Chaffcutting and Corncrushing
5. Bakeries (including Cakes and Pastry)
6. Biscuits
7. Sugar Mills
8. Sugar Refining
9. Confectionery (including Chocolate and Icing Sugar)
10. Jam, Fruit and Vegetable Canning
11. Pickles, Sauces, Vinegar

FACTORY CLASSIFICATION—COMPLETE LIST OF CLASSES AND SUB-CLASSES (*continued*)

Class IX—*Food, Drink and Tobacco* (*continued*)

12. Bacon Curing
13. Butter Factories
14. Cheese Factories
15. Condensed and Dried Milk Factories
16. Margarine
17. Meat and Fish Preserving
18. Condiments, Coffee, Spices
19. Ice and Refrigerating
20. Salt
21 Aerated Waters, Cordials, &c.
22. Breweries
23. Distilleries
24. Winemaking
25. Cider and Perry
26. Malting
27. Bottling
28. Tobacco Cigar, Cigarettes, Snuff
29. Dehydrated Fruit and Vegetables
30. Ice Cream
31. Sausage Skins
32. Arrowroot
33. Other

Class X—*Sawmills, Joinery Works, Boxes and Cases Woodturning and Woodcarving*

1. Sawmills
2. Plywood Mills (including Veneers)
3. Bark Mills
4. Joinery
5. Cooperage
6. Boxes and Cases
7. Woodturning, Woodcarving, &c.
8. Basketware and Wickerware, (including Seagrass and Bamboo Furniture)
9. Perambulators (including Pushers and Strollers)
10. Wall and Ceiling Boards (not Plaster or Cement)
11. Other

Class XI—*Furniture of Wood, Bedding, &c.*

1. Cabinet and Furniture Making (including Billiard Tables and Uphostery)
2. Bedding and Mattresses (not Wire)
3. Furnishing Drapery
4. Picture Frames
5. Blinds

Class XII—*Paper, Stationery, Printing, Bookbinding, &c.*

1. Newspapers and Periodicals
2. Printing, Government
3. Printing, General, including Bookbinding
4. Manufactured Stationery
5. Stereotyping, Electrotyping
6. Process and Photo Engraving
7. Cardboard Boxes, Cartons and Containers
8. Paper Bags
9. Paper Making
10. Pencils, Penholders, Chalks, Crayons
11. Other

Class XIII—*Rubber*

1. Rubber Goods, including Tyres Made
2. Tyre Retreading and Repairing

Class XIV—*Musical Instruments*

1. Gramophones and Gramophone Records
2. Pianos, Piano Players, Organs
3. Other

Class XV—*Miscellaneous Products*

1. Linoleum, Leathercloth, and Oilcloth, &c.
2. Bone, Horn, Ivory and Shell
3. Plastic Moulding and Products
4. Brooms and Brushes
5. Optical Instruments and Appliances
6. Surgical and Other Scientific Instruments and Appliances
7. Photographic Material, including Developing and Printing
8. Toys, Games and Sports Requisites
9. Artificial Flowers
10. Other

Class XVI—*Heat, Light and Power*

Electric Light and Power—

1. Government
2. Local Authority
3. Companies

Gasworks—

4. Government
5. Local Authority
6. Companies

(*a*) Prior to 1963–64 statistics of plywood mills were combined with sawmills for publication purposes. Except for details of logs sawn and sawn timber produced, this table now refers to sawmills only.
(*b*) Average *whole* year, including working proprietors. Excludes men engaged in felling, &c., and carting logs to mill.
(*c*) Excludes amounts drawn by working proprietors and amounts paid to workers engaged in felling, &c., and carting logs to mill.
(*d*) Represents principally value of logs sawn, peeled or sliced, but also includes value of minor items such as nails, tie-wire, &c., used.
(*e*) Includes cost of water and lubricating oils, containers, packing, &c., tools replaced, and repairs to plant.
(*f*) Value of sawn, peeled and sliced timber produced (shown in last column) plus added value due to re-sawing, kiln drying, dressing operations and making up into fruit cases, plywood, &c., where this is actually performed in the mills.
(*g*) Value of output less recorded costs of manufacture other than labour.
(*h*) Includes estimated value for *rented* premises and machinery.
(*i*) Includes sawn timber equivalent of peeled and sliced timber. The value of all timber produced during 1963–64 (at the rough-sawn stage) is estimated at £7,158,570.
(*j*) Not available for publication. Included in Statistical Division totals.
(*k*) Logs Sawn-Hardwoods 333,967,000 s. ft.; Softwoods 11,869,000 s. ft.

2. BUILDING STATISTICS

(i) BUILDING APPROVALS

(*a*) Figures relating to Building Approvals include details of:

(i) Permits issued by Local Governmental Authorities for the construction of *private* buildings.

(ii) Contracts let and day labour projects commenced by Governmental Authorities.

(*b*) *Values.*—All values shown exclude the value of the land and represent the estimated value of buildings on completion.

(ii) NEW BUILDING CONSTRUCTION

(*a*) Definitions of Terms Used:

Owner-Builder.—For the purpose of this bulletin, an owner-builder is a person who is actually building his own house or is having his house built under his own direction without the services of a contractor.

Commenced.—A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, classifications made by builders may not be entirely uniform.

Completed.—A building is regarded as having been completed when the contractor has fulfilled the terms of the contract. As with commencements, the classifications made may not be entirely uniform.

Under Construction.—A building remaining uncompleted at the end of a period is regarded as being under construction regardless of whether construction was proceeding on that particular date.

Employment.—The figures of employment relate to persons actually working on new buildings on a *specified day.* They include working principals, employees, men working as, or for, sub-contractors and men temporarily laid off on account of weather. In addition, they include some employees engaged on alterations, additions, renovations, or repairs to buildings when these jobs are undertaken by a contractor who builds new buildings. Because of frequent movement between jobs and because some persons (e.g., electricians) may work on several jobs which are under construction simultaneously, some duplication may occur. The figures exclude persons working on owner-built houses and employees of builders who undertake only alterations, additions, repairs and maintenance.

Values.—All values shown exclude the value of land and represent the estimated value of buildings on completion.

(*b*) Explanatory Notes:

Returns are obtained from:

(i) Building Contractors engaged in the erection of new buildings.

(ii) Owner-Builders.

(iii) Commonwealth, State, Semi- and Local Government Instrumentalities.

Details in this Bulletin relate only to the erection of new buildings, as distinct from the construction of railways, bridges, earthworks, water storage, &c.

Major new additions to existing buildings are included as new buildings.

Minor additions, alterations, renovations and repairs are excluded because of the difficulty of obtaining lists of persons who undertake this work.

Figures in this bulletin do not include converted military huts and temporary dwellings. (Figures for houses exclude flats and also exclude dwellings attached to other new buildings. The value of dwellings attached to other new buildings is included with the value of the buildings to which they are attached.) Figures for flats include "home units."

Details obtained from Government Authorities and Building Contractors refer to all areas. Details for owner-builders cover only those areas subject to building control by Local Government Authorities. Thus some farm buildings are excluded, but this does not affect the figures materially.

NOTE.—Comparisons as to trend should be made for complete years. Quarterly totals are affected by seasonal influences.

(iii) SUBURBS OF HOBART AND LAUNCESTON (pages 43, 44 and 46)

(*a*) Hobart Suburbs comprise—

(i) Parts of Kingborough Municipality (Blackmans Bay, Kingston, Taroona, &c.).

(ii) Parts of Clarence Municipality (Bellerive, Howrah, Warrane, Lindisfarne, Risdon Vale, &c.).

(iii) All Glenorchy City.

NOTE.—Definition of "Hobart and Suburbs" extended to include Risdon Vale as from 30th June, 1961.

(*b*) Launceston Suburbs comprise—

(i) Parts of St. Leonards Municipality (St. Leonards, Young Town, Waverley, Punchbowl, Norwood, Ravenswood, Elphin, &c.).

(ii) Parts of Lilydale Municipality (Newnham, Rocherlea, Mayfield, Vermont, &c.).

(iii) Parts of Beaconsfield Municipality (Riverside, Tenalga, Cormiston, &c.).

(iv) Parts of Westbury Municipality (Prospect Vale, &c.).

GENERAL INSTRUCTIONS.

STATE OF TASMANIA.

INSTRUCTIONS TO PERSONS FILLING IN FACTORY RETURNS.

GENERAL.

1. Under the authority of the Commonwealth " Census and Statistics Act 1905-49 " these returns are required to be filled in with the necessary details for the period 1st July, 1963, to 30th June, 1964, or thereabouts, and should be completed and returned by post to The Deputy Commonwealth Statistician, Hobart, not later than the 31st July, 1964. No extension of time will be granted unless it can be shown that it is impracticable to render the return by the specified date.

2. Returns will be regarded as strictly confidential. The information given in these forms is used only for statistical purposes to arrive at aggregates for each kind of industry in the Territory. The contents of individual returns are not disclosed in any way and no other department, or officer unattached to this Office, is permitted to see them.

3. Several Industries in One Establishment.—In large establishments where two or more industries are carried on, separate forms will be supplied, which should, if practicable, be filled in for each industry. The particulars relating to the whole establishment should be allocated, as nearly as possible, to each industry.

4. The line " Nature of Work Done " should be used for a brief description of the main operations or processes carried out, e.g., Brickmaking, Shirtmaking, Motor Repairing, Bread Baking, Sawmilling, &c.

5. A factory is defined as any Mill, Workshop or Plant engaged in the manufacture, preparation, treatment or repair of any article. Where a manufacturing business is carried on in connexion with a wholesale or retail trading business, the return must be restricted to the details of the *manufacturing branch only*. That portion of the premises used for manufacturing purposes should be separately valued and shown under Part C. *Particulars concerning Salesmen, Travellers, Collectors and Retailing Storemen must NOT be included with persons employed in the factory, or in salaries and wages paid.*

EXPLANATION OF ITEMS REQUIRED.

6. Period Worked.—The time the establishment was working during the year is to be given in calendar months, holidays during working period also being included.

Part A.

7. Average Number of Persons Employed.—This means the average monthly during the period of operation. For example, for an establishment working the whole year the average will be the sum of the *total* employees on the pay-roll on the last pay day of each month divided by 12; the average for an establishment working three months will be the sum of the monthly totals divided by 3, and similarly with other periods. The total of the average numbers employed must be distributed under the various groups as shown. *Persons engaged in selling or distributing must NOT be included.* (*See also para. 5 above.*)

(a) Employment on last pay day of month.—Particulars given should exclude working proprietors, but in all other respects should relate to the same classes of employees as are covered by the " Average Monthly Number of Workers " as shown opposite.

(b) Carters (on wages—not contractors) employed in bringing material for manufacture should be included, but not those engaged entirely *in the delivery of manufactured goods*, as the value of output of such goods is the selling value " at works ", excluding all delivery costs or charges. If the carter's work be divided in this respect, however, his time and wages should be apportioned accordingly.

8. Salaries and Wages Paid—

Working Proprietors.—No amount of remuneration is required to be shown.

Other Employees.—The total amounts of salaries or wages paid to all employees during the year (including overtime, bonuses, &c.) are required to be given.

Pay-roll Tax.—The amount paid as PAY-ROLL TAX must not be included as salaries and wages paid.

Part B.

9. Engines Employed to Drive Machinery.—Total rated horse-power of engines is required separately for engines ordinarily in use and for engines in reserve or idle (i.e., in use only occasionally as during periods of breakdown to own engines or power supply). Obsolete engines must be omitted altogether.

If the same power is used in the one establishment for more than one industry, the *horse-power* of the engines should be allocated, if practicable, as indicated in paragraph 3 above.

Part C.

10. Value of Land and Buildings used for Works and Factory Purposes.—Where the Land, Buildings and Fixtures are the property of the occupier, the values stated should be the depreciated values or book values *less* any depreciation reserve existing in respect of them. If the premises are rented, the annual rental payable exclusive of rates and taxes should be stated.

11. Value of Machinery and Plant.—This should include the value of all machinery, implements, and tools used; also plant for the conveyance of raw materials (such as trucks, trams, carts, horses, &c.) and casks in the case of a brewery. In brickyards, potteries, lime kilns and glassworks the value of the kiln should be included under this head, and not as a building. The values stated should be the depreciated values or book values *less* any depreciation reserve existing in respect of them. Where machinery is rented, the annual rental payable should be stated.

Part D.

12. Cost of Power, Fuel and Light Used (Codes 60-79).—Care should be exercised to see that the costs are not duplicated in any of the other items and that full particulars of quantities asked for are given for *each kind* of fuel, &c. (Where exact figures are not available, a careful estimate must be given.) Coal used in the manufacture of coke and gas, and coke used in steel furnaces, should not be included here but shown as a raw material in Code 85. Acetylene Gas and Oxygen should be similarly treated.

13. Containers, &c. (Code 84).—

(a) Non-Returnable.—The net cost to you of non-returnable containers actually used during the year should be shown.

(b) Returnable.—The actual net cost to you of replacements of returnable containers during the year should be shown.

14. (a) Other Costs of Production.—Costs such as insurance, taxation, &c., must not be included in Part D of the return. This is a return of selected items of factory statistics and is not intended to embrace all items of costs nor to reveal profit or loss. Only those costs specifically mentioned on the form are to be shown therein.

[P.T.O.

(b) **Materials Used, &c. (Code 85).**—The value quoted should be the **net** cost landed at the factory of all materials **actually used** during the year, and this will, of course, be exclusive of all subsidies, rebates, &c., allowed by the Government on such raw materials. Care should be taken to ensure that items included here have not been included already in other headings under Part D.

(c) **Making-up or Treating Customer's Materials.**—Include in Part D, Code 85, the value (cost) of maker's own materials, such as trimmings, cottons, &c. (dyes, &c., in dyeing), used, and in Part E, Item (B), the amount charged to customers for making-up or treating their materials.

(d) **Repair Work of any Kind.**—The value (cost) of all materials used in repairing should be included in Code 85, while the amount charged for making repairs should be shown in Part E, Item (B).

(e) **Assembling the Manufactured Parts of Machines, Motor Cars, &c.**—Where operations consist wholly or partly of assembling the manufactured parts of machines, motor cars, &c., the value of the parts should *not* be included in the cost of materials used, nor in the value of output. The latter value should be shown in Part E, Item (B), and should include the actual labour cost of assembling the parts, cost of fuel and power used, any additional expenses of assembly, and profit made on such work.

(f) **Finished Goods Purchased for Re-sale.**—The value of finished goods purchased for re-sale without treatment must not be included anywhere.

Part E.

15. (a) Value of Output—Items (A), (B)—

Item (A).—The value of output here given should be the *selling value at factory to customers of all goods made or processed during the year (including by-products) after deducting all costs of selling and distribution*, and after adding any bounty or subsidy received by the manufacturer on finished products and any wage refund or profit subsidy paid to the factory by the Government.

Item (B).—The value here given should be the *amount charged to customers for other work done such as repairs, renovations and alterations, and work done on commission.*

(b) **Goods in Process of Manufacture.**—The value of goods in process at the **end** of the year just completed must also be included in the value of output. Similarly the value of goods in process at the beginning of the same year must be added to the " cost of materials used "

(c) **Costs of Installation, &c.**—Where the selling price of manufactured goods includes installing or fixing (shop and window fittings, tiles, fibrous plaster sheets, &c.) the charges for transport, installation, erection or fixing of such goods must be deducted in valuing output in Item (A). Employees engaged in such work and their wages must also be excluded from Part A.

16. Excise and Sales Tax must not be included in the " Value of Output " or in the particulars given of any article manufactured.

17. Bounty and Subsidy.—The amount received as bounty or subsidy (of any kind) on the production of goods or as wage refund or as profit subsidy under the price stabilization scheme or otherwise must be included in the value of goods manufactured (Item (A)).

DIRECTIONS RELATING TO SPECIAL INDUSTRIES.

Bakeries.—Carters and all persons engaged solely in delivery and in selling the commodities produced should be excluded. The output value should be the selling value of bread, &c., made, less all delivery and selling costs.

Brick, Pottery, Tile and Lime Burning Works.—The value of materials used shown in Part D must include wages of pitmen and quarrymen and all other costs incidental to obtaining clay or limestone and delivering at the kiln. Such employees and the wages paid to them, should, therefore, *not* be included in Part A. The value of the kiln must be included as part of plant and not as a building.

Cold Storage.—The value of the commodities placed in the cold store should not be included in the cost of materials used (Part D), nor in the value of the output (Part E). The amount to be shown in Part E, Item (B) should include the actual labour cost, the cost of fuel and power used, any additional expenses of storing and profit made on such work.

Food-packing, Tobacco-cutting and Packing, Tea-blending and Packing, Bottling and Grading Establishments.—In these and other similar establishments where imported or other goods in bulk are made up in packets, but no actual manufacturing is done, only the value added to the material by the operation should be shown in Part E, Item (B). This value may be ascertained by subtracting the cost of materials used from the wholesale selling value of the finished goods.

Newspapers, Magazines and Journals.—If the newspaper, magazine or journal is printed by the proprietors, only the persons employed in the actual printing and the corresponding amount of wages paid to them, should be included in the return. The value of the output is not required, but all other particulars must be furnished. In other cases, where the newspaper or journal is printed for the proprietors by another person, it should be treated in the return of the printer as ordinary job printing.

If any difficulty arises the Deputy Commonwealth Statistician will be pleased to furnish additional information. (Box 66 A, G.P.O., Hobart. Telephone 2 2747).

2. CONSOLIDATED REVENUE FUND

(1) Effect of Adjustment to Special Grant (Commonwealth)

The Special Grant recommended by the Commonwealth Grants Commission under Section 96 of the Constitution has, since 1947–48, been in two parts. One part is in the nature of a preliminary grant to meet the estimated financial needs of the State during the current financial year. The other part is an adjustment made after the close of the financial year. The magnitude of the adjustment (which may be *positive* or *negative*) will depend on whether the *preliminary grant* made two years earlier proved greater or less than the amount of financial assistance deemed justified by the Grants Commission. See table below for record of adjustments made since 1947–48.

The Special Grant for 1963-64 was £5,100,000 subject to a positive adjustment of £278,000 assessed on 1961-62 accounts. The adjustment of £278,000 was transferred to the Accumulated Revenue Account.

(2) Government Activities Separated from the Consolidated Revenue Fund

(i) *Railways, Shipping and Road Transport Services*

In Tasmania, the railways (in common with certain other public transport utilities) are administered by the Transport Commission and, since 1939–40, only the net trading profits or losses of this authority have been paid to or from the Consolidated Revenue Fund. See page 19 for a summary of Transport Commission transactions. Interest and redemption charges on advances to the authority by the State Government are paid into Consolidated Revenue, as shown on page 13.

Omnibus services in Hobart, Launceston and Burnie are operated by the Metropolitan Transport Trust. Only the net losses of this authority are charged against Consolidated Revenue. See page 19 for a summary of the Trust's transactions and page 13 for debt charges paid to Consolidated Revenue.

(ii) *Hydro-Electric Commission*

Gross receipts and expenditure of this authority are not included in the Consolidated Revenue Fund. Interest and redemption charges on advances to the authority by the State Government are paid into Consolidated Revenue by the Commission. See page 18 for a summary of the Commission's transactions and page 13 for payment of debt charges to Consolidated Revenue.

(iii) *Finance for Roads*

The Commonwealth Aid Roads grant is paid into the State Highway Trust Fund which is augmented by transfers from the Consolidated Revenue Fund. For details of the State Highway Trust Fund, see page 20.

(iv) *Miscellaneous Activities and Authorities*

Also excluded from the Consolidated Revenue Fund are the gross receipts and payments of—Regional Water Supplies, Government Printing Office, Government Insurance Office, Public Trustee, Housing Authorities (see top table, page 20), Closer Settlement, Rural Credits and other activities of the Agricultural Bank. In accordance with various Acts, the *net* profits or losses of the *previous year* are paid to or from the Consolidated Revenue Fund for the *current year*.

(*a*) The assessment is shown against the actual year for which accounts have been examined by the Grants Commission; its announcement occurs much later.
(*b*) The two-year delay in application is due to the Grants Commission's obligation to perform a minute analysis of the accounts of the standard and claimant States before announcing the adjustment assessed for the claimant States.
(*c*) Preliminary grant plus or minus the applied adjustment.
(*d*) Including Tax Re-imbursement Grants up until 1958-59.
(*e*) Additional Assistance Grant.
(*f*) An Additional Assistance Grant was paid into a Trust Account in 1962-63. See first table on page 22.
(*g*) An Additional Assistance Grant of £1,408,000 made in 1963-64 was paid into a Trust Account (see page 11 and first table on page 22) but subsequently £450,000 was transferred into Consolidated Revenue.

Total	27,129,198	30,160,311	30,590,955	31,737,362	34,150,032
Collected Elsewhere in Australia (*c*)—					
Sales Tax	2,245,000	2,192,000	1,628,000	1,608,000	1,552,000
Customs	865,000	1,147,000	1,449,000	2,062,000	2,248,000
Excise	1,728,000	1,532,000	1,071,000	1,282,000	1,622,000
Estimated Incidence (*d*)	31,967,000	35,031,000	34,739,000	36,689,000	39,572,000

(*a*) Collections at the Central Office (which for the whole of Australia amounted to approximately one-third of the total), are not included. Includes tax on individuals and companies.

(*b*) Excluding duty collected in Central Office.

(*c*) Estimated. The amount of tax collected in other Australian States on goods transhipped to Tasmania is not known. However, retail sales per head of Tasmanian population were 94 per cent of the corresponding Australian figure in 1961-62 (when a Census of Retail Establishments was taken) and estimates have been prepared on this basis.

(*d*) Excluding Central Office collections of Income Tax and Estate Duty. It is assumed that Tasmania bears the incidence of Customs, Excise and Sales Tax collected in the other States in the form of increased commodity prices.

The rates of land tax (assessed on unimproved land values) payable during 1963-64 were as follows (subject to a 10% rebate)—

1. *Non-Rural Land*

Taxable Value (Selected Values) (*a*) £	Tax Payable £ *s.* *d.*	Taxable Value (Selected Values) (*a*) £	Tax Payable £ *s.* *d.*
240	0 10 0	9,600	76 0 0
480	1 0 0	14,400	136 0 0
960	2 10 0	24,000	276 0 0
2,400	8 10 0	36,000	488 10 0
3,600	16 0 0	48,000	738 10 0
4,800	26 0 0	72,000	1,338 10 0

(*a*) The taxable value of land is equal to its unimproved value. The minimum tax payable was 10*s*. Tax payable on intermediate values can be calculated by simple proportion, e.g. Tax on £4,000 equals £16 + $\left(\frac{400}{1,200} \times (£26–£16)\right)$

Land values exceeding £72,000 were taxed at the rate of 7*d*. in the £ on the excess.

2. *Rural Land*

Unimproved Value	Taxable Value	Tax Payable
£1–£4,800 ..	Nil	Nil
£4,801–£7,200 ..	(Unimproved value × 3) *less* £14,400	As for Non-Rural Land
£7,201 and over ..	Unimproved value	As for Non-Rural Land

In the above table the combined Commonwealth and State totals have been adjusted to exclude major duplications, but the separate Commonwealth and State figures are as shown in previous tables in this Appendix.

The items excluded from the adjusted figures are the following—Tax Reimbursements, Special Financial Assistance, payments of interest under the Financial Agreement, Special Grants, Coal Strike Emergency Grant and Price Control Reimbursement Grants by the Commonwealth, and State payments of Pay-roll Tax to the Commonwealth. Commonwealth grants to the States for Universities, Mental Institutions Capital Expenditure and Tuberculosis Capital Expenditure and payments from the Commonwealth National Welfare Fund are also excluded where these are received by State Consolidated Revenue Funds. There are other duplications for which allowance has not been made (e.g., various payments from the Commonwealth to the States for services rendered and miscellaneous Commonwealth receipts from the States) and the adjusted figures are therefore still slightly overstated.

(*a*) Net plant maintenance is plant maintenance and operating expenses, less hire charged to works.
(*b*) Excludes expenditures from Deposit and Superannuation Accounts, which are, from 1961–62, offset against receipts.
(*c*) These figures understate actual payments since some authorities offset their grants against payments made to State regional water schemes and record only net figures.
(*r*) Revised figures

(*a*) There was no debt outside Australia at 30th June, 1964.
(*b*) These advances were mainly made from State Loan Funds and therefore form part of the State Public Debt. "State Government" includes semi-governmental authorities such as the Housing Department which makes advances to Local Authorities in the development of housing settlements.
(*c*) Much of the debt is in the form of Instalment Debentures which involve equated periodic payments of redemption plus interest. Interest is not included in the table.
(*d*) Mainly periodic payments in reduction of principal; redemptions of loans from Sinking Funds are excluded. Such redemptions excluded are Hobart, £17,462; Glenorchy, £2,020; Launceston, £6,800.
(*e*) Hobart loan debt includes £136,136 for West Derwent Water Scheme. Responsibility for this debt was transferred to Metropolitan Water Board on 1st July, 1962.

Additional Notes on Water Schemes in Tasmania.

The Metropolitan Water Board, constituted under the provisions of the Metropolitan Water Act 1961, is responsible for the provision of an adequate bulk water supply to the metropolitan water districts of Hobart, Glenorchy, Clarence and Kingborough (Taroona Ward). The Board is empowered to direct the metropolitan local authorities in the operation of their bulk water supply works. Construction of the West Derwent Water Scheme commenced in 1962 and is now virtually complete. The total cost of construction to 30th June, 1964, was £2,461,691.

The Metropolitan Water Board is also vested with the control and management of the Southern Regional Water Supply Scheme which supplies the local government areas of Brighton, Clarence, Green Ponds, New Norfolk and Richmond. The capital cost of the scheme was £1,162,913.

The North Esk Regional Water Scheme is managed by the Rivers and Water Supply Commission. This scheme serves portions of the local government areas of Evandale, George Town, Lilydale, St. Leonards and Westbury and also provides water for industrial purposes. The capital cost of the scheme to 30th June, 1964 was £1,499,285.

The West Tamar Water Scheme is managed and maintained by the Beaconsfield Municipal Council as an agent for the Rivers and Water Supply Commission. The scheme was partly installed by the Council but the West Tamar Water Supply Act 1960 provides for the completion of the scheme and any further extensions to be carried out by the Commission. The capital cost of the scheme to 30th June, 1964 was £1,033,741.

(*a*) There was no debt outside Australia at 30th June, 1964.
(*b*) These advances were mainly made from State Loan Funds and therefore form part of the State Public Debt. "State Government" includes semi-governmental authorities such as the Housing Department which makes advances to local authorities in the development of housing settlements.
(*c*) Much of the debt is in the form of Instalment Debentures which involve equated periodic payments of redemption plus interest. Interest is not included in the table.
(*d*) Mainly periodic payments in reduction of principal; redemptions of loans from Sinking Funds are excluded. Such redemptions excluded are Local Authorities, £26,282, Metropolitan Transport Trust, £2,883.
(*e*) For separate details for each local authority, see page 12.
(*f*) Includes Ulverstone Harbour.
(*g*) Only semi-government authorities which have additional loan liabilities to creditors *other* than the State Government are included. Thus authorities like the Transport Commission and Housing Department which have borrowed exclusively from the State Government are excluded.
(*h*) Loans for Tramways raised by Hobart and Launceston Corporations before the formation of the Metropolitan Transport Trust are included as direct liabilities of the Trust.
(*i*) Loan money for this fund is made available by the Commonwealth but passes through State Trust Funds.
(*j*) Includes loan debt transferred from Rivers and Water Supply Commission.

STRUCTURE OF GOVERNMENT EDUCATION SYSTEM IN TASMANIA, 1964

General: Education is free, secular and compulsory from the age of six to sixteen years.

Levels of Education: (1) Sub-primary; (2) Primary; (3) Secondary; (4) Tertiary.

Sub-Primary: In centres where there are pre-schools (subsidized by the Education Department) pre-school education is provided for children between the ages of three and a half and five and a half years. Kindergartens exist in some large primary schools for children below the age of compulsory attendance.

Primary: Primary Schools, Area Schools and District Schools provide primary education through six grades, I-VI. The minimum age of entry to primary grades is five years.

Secondary: Secondary education is available in High Schools, District Schools, Area Schools and some Primary Schools with secondary grades. Entry to High Schools is on a non-selective basis except in the case of pupils from some Area Schools and some Primary Schools with secondary grades. The post-primary school for these pupils is determined by transfer committees. The average age of transfer from primary to secondary education is twelve years.

Tertiary: Technical Colleges provide trade, technician, professional, commercial and other training at the tertiary level in major population centres. A school of Art and a School of Music have been established.
Teachers colleges, under the control of the Education Department, provide a two year course of training. (The training of teachers is also undertaken by the University of Tasmania).

Secondary Courses:—

(1) Secondary Schools' Board Certificate Course: This three year course may be undertaken at all types of secondary school. The certificate is awarded on the basis of an internal examination. The course is both theoretical and practical with emphasis on the latter.

(2) Schools' Board Certificate Course: This is a four year course available at high schools and district schools. It leads to the Schools' Board Certificate which is awarded after either external examination or accrediting.

(3) Matriculation: Subjects for matriculation may be studied at four high schools to which pupils may transfer at the end of the fourth year. As a result of University regulations matriculation may be attempted at the end of the fifth year and at the end of the sixth year. Subjects gained at the fifth year, if insufficient to satisfy matriculation requirements, may be added to subjects gained at the sixth year.

Special Education: Special schools are provided for the education of physically and mentally handicapped children of sub-primary, primary and secondary school age. Education is provided by correspondence for pupils at all levels who are unable to attend school.

It should also be noted that Higher Court cases frequently proceed under different offences titles from those under which the Lower Court committals were made.

FRIENDLY SOCIETIES: TASMANIA

1. REPORT OF THE GOVERNMENT STATISTICIAN FOR THE YEAR 1963

16th February, 1965.

Sir,

In accordance with Section 10 of the Friendly Societies Act 1888, I have the honour to make the following report with respect to the year 1963.

(NOTE.—Figures in brackets refer to the previous year—1962)

Returns and Information

Copies of the printed report and tables for 1962 showing the movement in membership, finance, &c., of the societies, were distributed to all lodges and other interested parties.

During 1963, Male Branches and District Headquarters of the Tasmania District, Ancient Order of Foresters and St. John's Friendly Society, were dissolved in accordance with provisions of the Friendly Societies Act 1888. Statistics relating to these societies are therefore excluded from the 1963 data in this report. This has resulted in a break in comparability with previous years in some of the statistical series.

The statistical tables shown on pages 6 to 14 inclusive relate to ordinary friendly societies only. Special societies (required to register under the Friendly Societies Act), whilst having objects somewhat similar to ordinary societies are not strictly comparable, and therefore the details for ordinary and special societies are shown in separate sections.

Ordinary Societies

At the end of 1963 there were 11 ordinary friendly societies registered in Tasmania with a total of 119 subordinate lodges of which 110 were for males and 9 for females. "Ordinary" societies are those which provide customary sick and funeral benefits and are subject to actuarial valuation.

Special Societies

In addition to the 11 ordinary friendly societies, there were 6 "special" societies registered under the Friendly Societies Act, at the end of 1963. Membership of special societies is usually restricted to employees of industrial parent organisations. Funds of special societies are not subject to actuarial valuation.

Membership

Membership of friendly societies continues to decline. The total membership of ordinary societies at the end of 1963 was 6,364 comprising 6,192 (6,636) in male lodges and 172 (180) in female lodges. Some male lodges have a small number of female members. The following table shows the decline in membership over the past five years. (See also page 8)—

Ordinary Societies, Membership Progress

Year	Admissions		Departures		Membership at end of Year		
	Initiations	Total (*a*)	Deaths	Total (*b*)	Male Lodges	Female Lodges	Total
1959	4	25	319	661	8,306	251	8,557
1960 (*c*)	10	17	294	527	7,594	225	7,819
1961 (*c*)	13	23	299	518	7,039	213	7,252
1962 (*c*)	3	16	262	395	6,636	180	6,816
1963 (*c*)	8	34	264	359	6,192	172	6,364

(*a*) Includes Clearances and Reinstatements. (*b*) Includes Clearances, Resignations, and Arrears. (*c*) Excludes members of lodges which ceased to function during this year.

Distribution of Members According to Age

The very small number of persons seeking admission to friendly societies in recent years has had the effect of accelerating the decline in membership and also has resulted in a marked change in the age distribution of members. In 1920, members under the age of 30 years in male lodges represented more than one-third of the total membership. In 1963, this age group represented less than two per cent. During the period 1920 to 1963 the percentage of members aged 70 years and over, in male lodges, increased from 1.4 per cent to 27.2 per cent and the average age of members increased from 36.7 years to 59.5 years. Further details relating to age distribution are given in the following table.

Sickness and Mortality

A slight decrease in the number of cases of sickness in ordinary societies was experienced during 1963. This was distributed as follows: Male Lodges, 1,283 (1,311) cases, with a total duration of 137,891 (136,290) days or an average period of 107.5 (103.9) days per case; female lodges, 20 (26) cases with a total duration of 2,252 (3,179) days or an average period of 112.6 (122.3) days per case.

Details of sickness and mortality in ordinary societies over the past five years are given in the following table.

Receipts

Net revenue of ordinary societies for 1963 was £66,698 (£64,569), the chief items being members' contributions and levies, £19,687 (£22,749); interest, rent and dividends, £38,706 (£35,276) and miscellaneous items £8,305 (£6,544). Details for earlier years will be found on page 8.

Expenditure

Of ordinary societies' net expenditure of £55,536 (£54,540), the greater part was distributed in payment of benefits for members which totalled £34,366 (£34,731). This comprised £10,097 (£9,911) sick pay, £2,362 (£2,577) medical expenses and £21,907 (£22,243) funeral benefits. Of the remaining expenditure £17,182 (£15,330) represented cost of administration and £3,988 (£4,479) miscellaneous payments. A summary for 1963 and earlier years will be found on page 8.

Funds

Accumulated capital of ordinary societies by the end of 1963 amounted to £707,962 (£711,421) and the capital per financial member was £115 0*s.* 1*d.* (£106 14*s.* 5*d.*). The rate of interest earned by the funds was 5.59 (5.03) per cent. Details for this and earlier years are given in the table below and on page 8.
